DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 5-8, 12-13, and 17-20 rejected under 35 U.S.C. 102(b) as being anticipated by Nagel et al (U.S. Patent No. 5,362,008).

With respect to Claims 1-2, 5-8, 12-13, and 17-18, Nagel et al, Figures 1-6, teach a cassette attachable to a body of an image forming apparatus, comprising: a support portion that rotatably supports a roll in which a recording medium is wound; a guide member that guides, along a recording medium conveying path, the recording medium drawn from the roll supported by the support portion; and a stopper that selectively locates at a blocking position that blocks the recording medium conveying path and at an unblocking position that does not block the recording medium conveying path; wherein the stopper locates at the blocking position when the cassette is not attached to the body and locates at the unblocking position when the cassette is attached to the body.

With respect to Claims 19-20, the method described in these claims would inherently result from the use of the cassette of Nagel et al as advanced above.

Allowable Subject Matter

Claims 3-4, 9-11, and 14-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 21 is allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
